### BOOKLET - D ANSWER KEY

1. Which one of the following was a very important seaport in the Kakatiya Kingdom?
- A. Kakinada  
B. Motupalli  
C. Machilipatnam (Masulipatnam)  
d. Nelluru
- Answer: B. Motupalli**

**Motupalli was a famous sea port during Kakatiya Period. Marcopolo**, a Portuguese navigator, visited this place and wrote about the prosperity and power of Andhra Desa during the reign of Kakatiya kings in his travelogue. Motupalli inscription, issued by King Ganapati, in the mid thirteenth century, specifies the rates assessed on a variety of items including scents such as sandal and civet, camphor, rose water, ivory, pearls, coral, a range of metals (copper, zinc, and lead), silk, pepper, and areca-nuts. This list gives us a good idea of the types of luxury goods that were being exported and imported through Motupalli port to other Indian regions along the coast, as well as to foreign territories

(SIDS), which are hardest hit by the adverse effects of climate change.

The GCCA acts as a platform for dialogue and exchange of experience between the EU and developing countries on climate policy and on practical approaches to integrate climate change into development policies and budgets. The results of dialogue and exchange of views feed into the discussions on the post-2012 climate agreement under the *UN Framework Convention on Climate Change (UNFCCC), and inform the technical and financial cooperation supported by the GCCA.* Discussions take place at global, regional and national levels.

The GCCA also provides technical and financial support to partner countries to integrate climate change into their development policies and budgets, and to implement projects that address climate change on the ground, promoting climate-resilient, low-emission development. Technical and financial cooperation, in turn, informs political dialogue and exchange of experience at regional and global levels.

The five GCCA priority areas include:

- Mainstreaming climate change into poverty reduction and development strategies
- Adaptation, building on the National Adaptation Programmes of Action (NAPAs) and other national plans
- Disaster risk reduction (DRR)
- Reducing emissions from deforestation and forest degradation (REDD)
- Enhancing participation in the Global Carbon Market and Clean Development Mechanism (CDM)

Rest is open for contribution from others. The contribution of Government of India to NIIF would enable it to be seen virtually as a sovereign fund and is expected to attract overseas sovereign/ quasi-sovereign/multilateral/bilateral investors to co-invest in it. Cash-rich Central Public Sector Enterprises (PSUs) could contribute to the Fund, which would be over and above the Government's 49%. Similarly, domestic pension and provident funds and National Small Savings Fund may also provide funds to the NIIF. NIIF may utilize the proceeds of monetized land and other assets of PSUs for infrastructure development. The NIIF will work out these details in consultation with the **Ministry of Finance**, to match different investors' preferences.

- a. 1,2 and 3
- b. 1 and 3 only
- c. 2 and 3 only
- d. 1 only

**Answer :A**

UN General Assembly had already urged its members before on several occasions to address urbanization issues, it is only in the 1970s that tangible yet timid actions were taken to deal with the rapid and often uncontrolled growth of cities. On 1 January 1975, the UN General Assembly established the *United Nations Habitat and Human Settlements Foundation (UNHHSF)*, the *first official UN body dedicated to urbanization*. Then under the umbrella of the United Nations Environment Programme (UNEP), its task was to assist national programmes relating to human settlements through the provision of capital and technical assistance, particularly in developing countries. The UNHHSF was only given an initial budget of 4 million US dollars for a total period of four years.

At the time, urbanization and its impacts were less prominent in the UN agenda, mainly because two-thirds of humanity was still rural. The first international UN conference to fully recognize the challenge of urbanization was held in Vancouver, Canada. This conference – Habitat I – resulted in the creation, on 19 December 1977, of the precursors of UN-Habitat: the United Nations Commission on Human Settlements – an intergovernmental body – and the United Nations Centre for Human Settlements (commonly referred to as “Habitat”), which served as the executive secretariat of the Commission.

Habitat was then also mandated to manage the UNHHSF funds. From 1978 to 1996, with meagre financial and political support, Habitat struggled to prevent and to ameliorate problems stemming from massive urban growth, particularly in developing countries. In 1996, the United Nations held a second conference on cities – Habitat II – in Istanbul, Turkey to assess two decades of progress since Habitat I in Vancouver and to set fresh goals for the new millennium. Adopted by 171 countries, the political document – dubbed the Habitat Agenda – that came out of this “city summit” contained over 100 commitments and 600 recommendations.

From 1997 to 2002, Habitat – guided by the Habitat Agenda and, later, the United Nations Millennium Declaration in 2000 – underwent a major revitalization, using its experience to identify emerging priorities for sustainable urban development and to make needed adjustments and corrections in its direction and organizational structure. On 1 January 2002, through General Assembly Resolution A/56/206, Habitat’s mandate was strengthened and its status elevated to a fully-fledged programme in the UN system, giving birth to UN-Habitat, the United Nations Human Settlements Programme. Key recommendations and fine tuning of the agenda were now underway, along with new strategies for achieving the urban development and shelter goals and targets for the next 15 years.

In 2015, member states approved the Sustainable Development Goals including a dedicated goal for urban development, SDG11 which calls to “Make cities and human settlements inclusive, safe, resilient and sustainable.” A year later, at the UN Conference on Housing and Sustainable Urban Development – Habitat III – member states signed the New Urban Agenda. This is an

1. Under NSQF, a learner can acquire the certification for competency only through formal learning.
  2. An outcome expected from the implementation of NSQF is the mobility between vocational and general education.
- Select the correct answer using the code given below:
- a. 1 only
  - b. 2 only
  - c. Both 1 and 2
  - d. Neither 1 nor 2

**Answer :B**

National Skills Qualifications Framework (NSQF), a quality assurance framework which organizes qualifications according to a series of levels of knowledge, skills and aptitude. These levels are defined in terms of learning outcomes which the learner must possess regardless of whether they were acquired through **formal, non-formal or informal learning**.

The NSQF would also help shift emphasis to **outcome based learning - both in the general and vocational space**. Today, there is lack of uniformity in the outcomes associated with different qualifications across institutions, each with its own duration, curriculum, entry requirements as well as title. This often leads to problems in establishing equivalence of certificates/diplomas/degrees in different parts of the country, which in turn impacts the employability and mobility of students. By shifting the focus from inputs to learning outcomes, the NSQF would aim to tackle this challenge.

Ministry of Labour and Employment, on 20 July 2015, launched the National Career Service (NCS) Project by transforming the processes in the existing network of 978 Employment Exchanges whereby they also function as career centers. These Employment Exchanges including the 75 University Employment Information and Guidance Bureaux are now transformed into career centers. In fact, the hitherto existing web based National Employment Service comprising of a network of 978 Employment Exchanges is now transformed into National Career Service (NCS) by leveraging information technology to improve the delivery of services. In many states, the previous system still required job seekers to physically visit the Employment Exchanges for registration, verify their records and wait for opportunities to come. Similarly, the employers had to visit Employment Exchanges for posting job vacancies and obtaining a list of eligible candidates, with little flexibility. The NCS portal provides a nation-wide online platform for jobseekers and employers for job matching in a dynamic, efficient and responsive manner.

14. Which of the following statements best describes the term ‘Scheme for Sustainable structuring of Stressed Assets (S4A), recently seen in the news?’

- Which of the statements given above is/are correct?
- a. 1 only
  - b. 2 only
  - c. Both 1 and 2
  - d. Neither 1 nor 2

**Answer: B**

**Climate and Clean Air Coalition to Reduce Short-Lived Climate Pollutants (CCAC)** was launched by the (UNEP) and six countries—Bangladesh, Canada, Ghana, Mexico, Sweden, and the United States—on 16 February 2012. The CCAC aims to catalyze rapid reductions in short-lived climate pollutants to protect human health, agriculture and the environment. To date, more than \$47 million has been pledged to the Climate and Clean Air Coalition from Canada, Denmark, the European Commission, Germany, Japan, the Netherlands, Norway, Sweden, and the United States.

Short-lived climate pollutants (SLCPs) are agents that have relatively short lifetime in the atmosphere – a few days to a few decades – and a warming influence on climate. The **main short-lived climate pollutants are black carbon, methane and tropospheric ozone**, which are the most important contributors to the human enhancement of the global greenhouse effect after CO<sub>2</sub>. These short-lived climate pollutants are also dangerous air pollutants, with various detrimental impacts on human health, agriculture and ecosystems. Other short-lived climate pollutants include some **hydrofluorocarbons (HFCs)**. While HFCs are currently present in small quantity in the atmosphere, their contribution to climate forcing is projected to climb to as much as 19% of global CO<sub>2</sub> emissions by 2050

the Indian Ocean Basin, and is a significant contributor to rainfall variability in this region.

Like ENSO, the change in temperature gradients across the Indian Ocean results in changes in the preferred regions of rising and descending moisture and air.

In scientific terms, the IOD is a coupled ocean and atmosphere phenomenon, similar to ENSO but in the equatorial Indian Ocean. It is thought that the IOD has a link with ENSO events through an extension of the Walker Circulation to the west and associated Indonesian throughflow (the flow of warm tropical ocean water from the Pacific into the Indian Ocean). Hence, positive IOD events are often associated with El Niño and negative events with La Niña. When the IOD and ENSO are in phase the impacts of El Niño and La Niña events are often most extreme over Australia, while when they are out of phase the impacts of El Niño and La Niña events can be diminished.

Cave 1 is a magnificently painted Vihara (monastery), filled with wall murals, sculptures, and ceiling paintings, that date back to the 5th century. Originally, Cave 1 also had a porch which led to the main hall, however it has since collapsed.

The main hall of Cave 1 is a square in plan, with aisles along all four sides. Adjacent to these aisles are doorways leading to fourteen small chambers. Cave 1 contains twenty painted and carved pillars. Above the pillars are reliefs depicting tales from the life of Buddha (Jataka tales). Located at the rear of the hall is a large shrine of the Buddha. The walls were originally covered in paintings, but today there are only nine surviving images, the most famous being *the Bodhisattva Padmapani (Padmapani in Sanskrit literally translates into "one who holds the lotus")*.

Raj Jaat is organized once in 12 years. The Jaat (meaning Yatra or pilgrimage) starts from Nauti village near Karnprayag and goes up to the heights of Roopkund and Homekund with a four horned sheep. After the havan - yagna is over, the sheep is freed with decorated ornaments, food and clothings, and the other offerings are discarded.

An annual Nanda Jaat is also celebrated. The Raj Jaat procession goes through villages, where there is a recognized Nanda Devi temple. At Koti, a night halt of the participants takes place where a night-long worship and celebrations take place.

Though in the Johar Valley region, there is no tradition of Nanda Raj Jaat but the worship, dance and the ritual of collecting Bramhakamal (it is called Kaul Kamphu) is part of Nanda festivals. The Nanda Devi fair is held at Almora, Nainital, Kot (Dangoli), Ranikhet, Bhowali, Kichha and also in the far flung villages of Lohar (like Milam and Martoli) and Pindar valleys (like Wachham and Khati). In the villages of the Pinder valley, people celebrate the Nanda Devi Jaat (journey) every year, while in Lohar people come from far and wide to Danadhar, Suring, Milam and Martoli in order to worship the Goddess. In Nainital and Almora, thousands take part in the procession carrying the dola (or litter) of Nanda Devi. It is said that the Nanda Devi fairs started in Kumaon during the reign of the King Kalyan Chand in the 16th century. A three-day fair is held at Kot Ki Mai or Kot Bhramari Devi. The fair at Saneti comes every second year. Both these fairs are rich in folk expressions, and many village products are brought for sale.

**Pandharpur Wari** or **Wari (Vari)** is an annual pilgrimage (yatra) to Pandharpur - the seat of the Hindu god Vithoba in the Indian state of Maharashtra, in honour of the deity. palakhis (palanquin processions) carrying the paduka (foot prints) of various saints - most notably Dnyaneshwar and Tukaram - from the Varkari (Warkari, "one who performs the Wari") sect (which venerates Vithoba), are taken from their respective shrines to Pandharpur. The tradition is more than 700 to 800 years old.<sup>[1][2][3]</sup> Dnyaneshwar's palakhi leaves from Alandi, while Tukaram's begins at Dehu; both in Pune district of Maharashtra. This March on foot from various locations in Maharashtra to Vithoba temple, Pandharpur, attracts a total of over a million pilgrims<sup>[citation needed]</sup>. The journey takes 21 days. Numerous palakhis join the main Tukaram and Dnyaneshwar palkhis that starts from Dehu and Alandi respectively. The wari culminates at the Vithoba temple on Ashadhi Ekadashi.<sup>[4]</sup> Devotees from Maharashtra and nearby areas set out for Pandharpur, wearing holy basil beads and singing the glories of Vithoba and songs like "Gyanba Tukaram", commemorating the saints.<sup>[5]</sup> Upon reaching Pandharpur on Ashadi Ekadashi, these devotees take a holy dip in the sacred Chadrabhaga River before proceeding to take Darshan (see) Vithoba's central icon in the main temple
